When installing outside and inside angles to FRP panels, use Crane Advanced Polymer Panel Adhesive. Acrylic, epoxy or urethane based adhesives should be used to provide an adequate bond. Silicone sealant is not meant to be used as an adhesive and will not properly bond the angle to the FRP panel.

#### STANDARD NYLON DRIVE RIVETS

##### PRODUCT

Non-staining nylon drive rivets in matching panel colors are designed for quick and easy installation using only a hammer and drill. When used with silicone sealants, drive rivets maintain an effective moisture seal as well as providing excellent mechanical fastening for panels.

##### PURPOSE

See table for rivet size and corresponding panel thickness.

0.09" to 0.125" 2.29 mm to 3.18 mm	0.75" 19.05 mm	White, Cream, Beige, Silver, and Gray
