

CREATING A CLEANER, SAFER, HEALTHIER WORLD.

Tennant Coatings Advantage: Food and Beverage

DURABLE SOLUTIONS FOR DEMANDING
FOOD & BEVERAGE FACILITIES

Your Floors

CHOOSE THE TENNANT COATING THAT'S RIGHT FOR YOU

- Thermal shock and chemical resistance for durability in extreme environments
- Texturing for slip-resistance in wet conditions to reduce the chance of slip and fall accidents
- Seamless application to make cleaning and disinfecting easier

HIGH-PERFORMING TENNANT COATINGS PROVIDE THE PERFORMANCE YOU NEED

For the food and beverage industry, performance means long-lasting floors that can stand up to extremes of temperature and help maintain the level of hygiene required. With Tennant floor coatings, you get:

- NSF® registered products for use in food and beverage production areas
- Durable floor coatings to repair eroded or sloped areas effectively
- Slip-resistant textures to help prevent slip and fall accidents in wet conditions
- Surfaces that withstand extremes in temperature, chemical exposure, and high pressure cleaning
- Flooring systems that may contribute to LEED credits for Indoor Environmental Quality

CEMENTITIOUS URETHANT TROWELED AND SLURRY SYSTEMS

- Effectively repairs moderately eroded or sloped areas damaged by chemical exposure, thermal shock and high pressure/high temperature cleaning
- Creates a safer workplace with a slip-resistant texture to prevent slip and fall accidents in wet conditions

TENNANT MMA™ SYSTEM

- Solvent free and Phthalate (BPA) free
- Durable, abrasion- and impact-resistant formula withstands extreme temperature variations, heavy-wheeled traffic and high-pressure cleaning
- Creates safer workplaces with a slip-resistant texture effective in wet conditions
- One hour cure time at temperature of 20 degrees below zero

GLAZE AND MAT WALL SYSTEMS

- Easy-to-clean wall surfaces that can help reduce maintenance costs
- Durable, epoxy-based coatings resist wear
- An array of colors and textures available

1/8" BROADCAST QUARTZ SYSTEM

- Abrasion and chemical resistance
- Textured to provide traction, reducing the potential for slip and fall accidents

Talk to your Tennant Coatings representative to learn about these and other floor coatings for your environment

SUSTAINABLE SOLUTIONS

BioH® polyols are soy-based ingredients used to replace a portion of the petroleum chemicals in a variety of polyurethane applications.

ec-H2O™ technology electrically converts water into an innovative cleaning solution that cleans effectively, saves money, improves safety, and reduces environmental impact compared to daily cleaning floor chemicals.

Orbio® split stream technology generates a cleaning solution that can be used on and off the floor. It can reduce the expense, effort, and environmental footprint associated with conventional daily-use cleaning chemicals.

CHOOSE TENNANT FOR YOUR FLOOR CARE NEEDS

Tennant offers the flooring industry's most complete and integrated floor care solutions to help you create a cleaner, safer environment for employees, guests, and customers. A floor care system of high-performing Tennant® coatings and scrubbers will:

- Maximize your floor's natural life
- Minimize your maintenance and repair costs
- Create a world-class impression that reflects your highest standards
- Protect your floors from the wear of heavy equipment, harsh chemicals, and extreme temperatures

CERTIFICATIONS

Eco-DQS™ with Eco-TCU™ Topcoat, Eco-HTS™ Satin Urethane Topcoat, Orbio® Multi-Surface Solution, ec-H2O™ and FaST® technologies are NFSI (National Floor Safety Institute) Certified. Products gain NFSI certification by demonstrating acceptable wet slip resistance through both laboratory and real-world testing.

Cementitious Urethane Troweled and Slurry Systems, Orbio® Multi-Surface Solution, ec-H2O and FaST technologies are registered by NSF International. NSF International is an independent, not-for-profit organization that ensures formulation and labels of products used in food and beverage processing facilities meet appropriate food safety regulations.
