

Eco-DQS Decorative Quartz System | Eco-HTS Satin Urethane Topcoat

Increase Your Facility Safety with NFSI-certified Coatings

Reduce the Risk Of Slip-And-Fall

Certified “high traction” by the National Floor Safety Institute (NFSI), Eco-DQS™ with Eco-TCU™ topcoat and Eco-HTS™ are the first-ever commercial floor coatings to be certified by the NFSI as “high traction” – meaning they can reduce a facility's risk of slip-and-fall. When properly applied and maintained, your floors coated with these Tennant products will:

- Meet a higher standard of slip-resistance;
- Reduce your potential liability for slip-and-falls;
- Create a safer environment for your employees and customers.

A Cleaner Floor is a Safer Floor

In addition to increasing safety, NFSI-certified Tennant coatings also make your floors easier to clean by increasing durability and chemical resistance, and decreasing dust, dirt, and liquid build-up. This, in turn, reduces maintenance and protects your floor's natural life.

To maximize your floor safety, combine NFSI-certified coatings with Tennant scrubbers featuring NFSI-certified FaST™ scrubbing technology and achieve the cleanest, driest, safest floors possible.

TENNANT COATINGS

For First Impressions That Last™

When the NFSI logo is placed on a product it is a public declaration that the product has passed comprehensive safety tests.

WHAT IS THE NATIONAL FLOOR SAFETY INSTITUTE (NFSI)?

The National Floor Safety Institute was founded in 1997 as a non-profit 501(c)(3) organization whose mission is to aid in the prevention of slip-and-fall accidents through education, training and research.

WHY IS THE NFSI SO IMPORTANT?

Because NFSI is a non-profit organization it has no financial interest in the products tested. This facilitates unbiased testing practices and judgments. When the NFSI logo is placed on a product it is a public declaration that the product has passed comprehensive safety tests.

WHAT DOES NFSI CERTIFICATION MEAN TO ME?

It's easy to say products provide high-traction support, or reduce the potential for slip-and-fall accidents, but only NFSI certification ensures a product has passed a comprehensive, 2-phase testing process for floor products.

WHO IS BEHIND THE NFSI?

The NFSI is led by a fifteen-member Board of Directors comprising of product manufacturers, insurance underwriters, trade associations, and independent consultants.

NFSI is also backed by 19 corporate sponsors ranging from insurance companies to commercial cleaning businesses including State Farm Insurance, Ecolab, Rubbermaid Commercial Products and P&G. Tennant is proud to support the National Floor Safety Institute as part of our mission to create a cleaner, safer world mission.

IS THE NFSI CERTIFICATION ALL THERE IS TO PRODUCT SAFETY?

No. NFSI may prove that a particular product reduces the potential for slip-and-fall accidents, but any product can become unsafe if it is abused or used contrary to manufacturer's instructions. So, be sure to read care and maintenance instructions and warnings and follow them carefully. Be alert when using any product, and always use common sense to help keep you safe.
